

**Superior Craftsmanship including Hardwood Cabinetry, Solid Surface Countertops and Vast Storage.**

**DURABLE CONSTRUCTION**

HOST Campers are built with a complete aluminum structure featuring a full fiberglass, vacuum-bonded exterior, one-piece roofing and solid block insulation making it perfect for any season. Large tank capacities make it easier to stay away longer.

**CAMPERS MADE BY PEOPLE WHO CAMP**

The team at HOST RV is always striving to make your experience in the great outdoors more enjoyable, comfortable and convenient. That's why our never-ending commitment to improve every camper we build revolves around you.

**HOGUE AND STORCH** - Two legendary names in the RV business have created the most innovative campers on the market today. Jim Hogue and Frank Storch founded Beaver Coaches and took the company to the forefront of the industry from the '60s through the '90s. In 2000 the next generation empowered what they learned from the masters and created HOST Campers. Dave Hogue and Mark Storch continually work to provide you with an absolutely fabulous camper with features and comforts you won't find anywhere else in the industry.

**TAHOE 10.5'**

The Tahoe camper has many of the features and capacities of our larger Yellowstone camper. Its lower weight allows you to carry it with a lighter duty truck or carry additional cargo or tow a larger trailer. It comes standard with a dinette slide-out. With the addition of the kitchen slide-out, the Tahoe has the most interior space and storage space of any 10.5' truck camper.

**BACHELOR 8.5'**

The standard configuration for the Bachelor can fit either a short or long box truck. The optional short box skirts offers additional outside storage and a generator compartment. This compact extended stay camper provides much more than its size dictates.

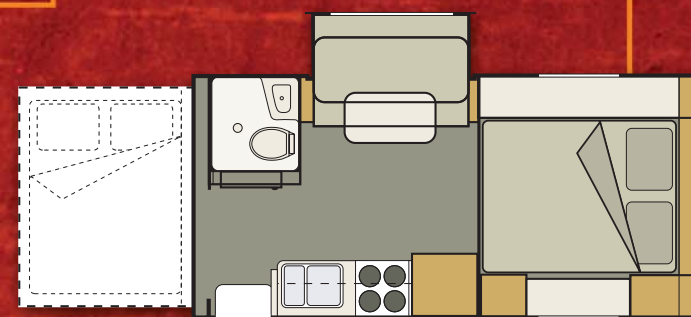

**YELLOWSTONE 11.5'**

Step into a dual slide-out HOST Yellowstone and you will swear you are in an upscale motorcoach. It has exterior and interior storage capacities like no other camper. Yet it is still much lighter than any other all-season camper on the market. The Yellowstone comes standard with a dinette slide-out with a kitchen slide-out option.

**McKINLEY 8.5' SIDE-ENTRY**

The McKinley is one of the most unique campers on the market. It is the only side-entry camper designed for a short box truck. With the optional rear fold-down queen bedroom, the McKinley has three separate sleeping areas that can sleep up to five people. The standard sleeper couch in the slide-out room transforms into a roomy dinette. All this comfort in a compact 8.5' truck camper.

**YUKON 11.5' SIDE-ENTRY**

Finally a truck camper the whole family will enjoy. The HOST Yukon side-entry truck camper, with the optional fold-down rear queen bedroom and overhead bunk, can comfortably sleep up to 7 people. You will be pleasantly surprised by all the standard features on this all-season extended-stay camper.

**RAINIER 9.5'**

The Rainier has many industry exclusives. It is the only 9.5' truck camper on the market that is available with dual slide-outs. The Rainier has more interior space than many 11.5' slide-out campers. The single slide-out Rainier with dry bath is the shortest dry-bath camper available today. Now you know why the Rainier is one of our most popular models.

**EVEREST 11.5' TRIPLE SLIDE**

The HOST Everest is truly the ultimate truck camper. When you step inside this TRIPLE slide-out camper, you will be amazed at the large living space. It's hard to believe that you are in the bed of a pickup truck. This camper offers lots of storage, a large bathroom with a tub/shower combo, separated bedroom area, and most of all plenty of room to kick back with family and friends.
